About Me

My Name is Muhammad Qasim Raza. I am a Student of Undergraduate "Bs Software Engineering" (6th Semester) at Sindh Madrasa-tul-Islam University, City Campus, Karachi.

I am currently learning MERN Stack Development at "Bano Qabil Institute" and (SMIT) "Saylani Mass It Training Program" to improve my skills in developing full-stack web applications. Although I have just started the program, I am excited to learn about MongoDB, ExpressJS, ReactJS, and NodeJS, which are key tools and technologies used in this field.

- As a student, I am an entry-level candidate who is eager to learn and contribute to the organization.
- My academic background in software engineering has provided me with a strong foundation in relevant skills and knowledge, even if I haven't had the opportunity to apply them in a professional setting.
- Although lacking previous work experience, I am driven and eager to acquire new skills and advance in a professional environment.
